- Product compliance for this column follows CACFP regulations outlined in 7 CFR Parts 210, 215, 220 and 226.
- United States Department of Agriculture (USDA) Food and Nutrition Service (FNS) recognizes that some schools serve meals to preschoolers and K-5 students in the same area simultaneously. Comingled situations may cause counting and claiming issues due to the different meal pattern requirements between preschoolers and K-5 students and how challenging it may be to determine which group a child belongs to. To reduce administrative burdens and ensure integrity of Child Nutrition Programs (CNP), schools that are considered comingled may choose to follow the grade-appropriate meals patterns for each grade group, or serve the K-5 NSLP and SBP meal patterns under parts 7 CFR 210.10 and 220.8 to both grade groups as stated in Memo SP 37-2017.
- To be eligible to operate the At-Risk Afterschool Meals component of CACFP, an afterschool program must: (1) be organized primarily to provide care for children after school or on the weekends, holidays, or school vacations during the regular school year, (2) provide organized regularly scheduled education or enrichment activities, and (3) be located in an attendance area of school where ≥ 50% of the children are eligible for free or reduced price meals (see Part 1, Section c) [7 CFR 226.2; 7 CFR 226.17a(b)]. SFAs preparing at-risk afterschool meals may choose to use the NSLP and SBP or CACFP meal pattern requirements [7 CFR 226.20(i)].
- The Seamless Summer Option follows NSLP and SBP meal pattern requirements outlined in 7 CFR 210.10 and 220.8, respectively.
- Zee Zees Applesauce aligns with the CACFP best practices to reduce added sugars in child meals.
- Zee Zees Original Unsweetened Applesauce, 6 oz (Item Code: 614514) meets ¾ cup FRT meal contribution and is available for children ages 13-18 or to meet CACFP snack meal pattern requirements.
- Zee Zees Four Fruit Mixed Fruit Cup, 4.5 oz (Item Code: A1760) meets ¾ cup FRT meal contribution and is available for children ages 13-18 or to meet CACFP snack meal pattern requirements.

- Pasteurized juice can be served in programs operating under CACFP and credited towards the fruit or vegetable component for one meal per day and may be served in frozen forms, such as with Zee Zees Glacier™.
- Bars are considered grain based dessert according to Exhibit A as specified in §210.10. Centers and day care homes have the flexibility to serve grain based desserts as additional food item, however it cannot contribute to the meal components and must be purchased with non-food funds
- National Food Group has a Product Formulation Sheet (PFS) on file for our commercially-prepared hummus and bean dipz™ to be creditable under CACFP guidelines per the State Agency Memo: CACFP 10-2014.
- Mixzees® dried fruit, raisins, sunflower kernels and cruncherz are considered choking hazards for children < 4 years old. To further reduce the risk of choking for young children, we suggest not serving dried fruit. Raisins can be cooked and sunflower kernels can be finely chopped to prevent this result. Do not serve these items to infants.
- The 1.33 oz raisins and Mixzees® dried fruit only meet ¼ cup FRT under the Summer Food Service Program crediting guidelines that state dried fruit credits based on volume served. The School Food Authority (SFA) may choose to follow NSLP guidelines in 7 CFR 210.10 for summer feeding that credits ¼ cup dried fruit as ½ cup FRT. Please refer to the Food Buying Guide for Child Nutrition Programs.
- Sweet crackers, such as graham crackers, are allowed in NSLP (up to 2.0 oz eq grain-based dessert per week in grades K-12) as specified in §210.10. They may also count towards the grain component in SBP (grades K-12), CACFP, NSLP/SBP infant and preschool meals, and SFSP.
- Nuts, seeds & roasted legumes are not reimbursable for infants < 1 year old.
